

# ALPEREN POLAT

STUDENT OF COMPUTER  
ENGINEERING DEPARTMENT AT  
NİŞANTAŞI UNIVERSITY

## ABOUT ME

I am a senior computer engineering undergraduate student who is responsible, always willing to learn new information and passionate about software. I am socially active. I can adapt to the team within the scope of engineering ethics. My biggest goal is to advance in the frontend field.

## PROJECTS

### ABSOLİT WEBSITE

- **Languages Used**

This website is written with Visual Studio 2022 using HTML, Css, JavaScript, Bootstrap.

- **Project Objective**

The purpose of this project is for users to have information about natural stones, zodiac signs and compatibility by logging in to their own accounts and to reach their own horoscope comments via e-mail. You can review the project in detail on my github profile.

### ABSOLİT MOBİL APPLICATION

- **Languages Used**

This application is written with Android Studio using Flutter and dart programming language.

- **Project Objective**

Although not all options work, users can choose the product they want from the categories, add them to the cart and shop.

The categories part of the project work with the database (Sqlite). The project has a design section and a database section. You can review the project in detail on my github profile.

### EDUCATION

#### SECONDARY SCHOOL

Kutlubey College

2014 - 2018
